

NOTICE OF SEPA THRESHOLD DETERMINATION (DNS)

Notice is hereby given that an environmental Determination of Non-Significance (DNS) has been issued pursuant to the State Environmental Policy Act (SEPA) Rules (Chapter 197-11, Washington Administrative Code) for **North Ranch Surface Impoundment-Bio Recycling Corporation**. The SEPA co-lead agencies are Mason County and the Washington State Department of Ecology (Ecology).

Site Address and Project Location: **820 E Webb Hill Road**

Parcel Number: **32118-10-02000**

Date of Application: **March 20, 2018**

Project Description: To comply with requirements for Final Coverage under the General Permit for Biosolids Management (Ecology) Bio Recycling Corporation plans to install a surface impoundment on site. The purpose of the proposed surface impoundment is to accept and store filtrate from dewatering of Class B biosolids during the seasonal wet period from October through March. The stored filtrate, which provides nutrients for plant growth, will be land applied to the permitted 300-acre crop area during the spring and summer.

Project approvals and permits required:

- Ecology Water Resources Program Dam Construction Permit
- Mason County Land Modification (Grading) Permit
- Stormwater Pollution Prevention Plan (SWPPP)
- Ecology Approval of Engineering report, Plans, Specifications, Operations and Monitoring Plan, Closure Plan, Construction Inspection, and Construction Quality Assurance Plan

You can find detailed project proposal on the County's ftp site (site may not be accessible on hand held devices):
