

COMMUNITY MEETING

SKOKOMISH VALLEY ROAD IMPROVEMENT PROJECT

The community is invited to a meeting to discuss potential improvements to the Skokomish Valley Road in the general area between the Vance Creek bridge and Eells Hill Road. The Mason Conservation District and Mason County are evaluating a suite of road improvement options aimed at improving habitat and flood resiliency. The work is funded by a Salmon Recovery grant.

During this meeting, Mason Conservation District and their consultant Cardno, will share the preferred road alignment, how it was selected, and report flood and habitat improvement findings. Four different alignments were evaluated and the preferred alignment is the current road location.

Mason County is seeking community input on the preferred alignment, and what questions or concerns need to be addressed if the project moves to the design phase.
